2. OBJECT

2.1. The contracting of **180-hour "DRY" training services in the VH-35 (EC-135) aircraft flight simulator equipment**, in order to meet the needs of the COMAER, in accordance with the Technical Data Sheet, APPENDIX A of the BASIC PROJECT, according to the conditions, quantities and expectations established in this document, and in the table below:

ITEM	ODGSA	QTD OF HOURS / IOS	AIRCRAFT	CATEGORY	GUY	REFERENCE UNIT VALUE (USD)	TOTAL REFERENCE VALUE (USD)
1	GABAER	180 hours	EC-135 (VH-35)	D	DRY	1.114,76	200.657,40
2	GABAER	5 IOS	EC-135 (VH-35)	D	DRY	Free Of Charge	Free Of Charge

2.2. The training type "DRY", presented in the Technical Data Sheet, means that the contracted company should only rent the hours in the flight simulator, because the instructors will be the own pilots of the Brazilian Air Force, after participating in the course for simulator operation, provided by the CONTRACTED COMPANY.

2.3. In light of the complexity of the avionics and the emergencies associated with the aircraft, the simulator for the training of pilots must be certified as Full Flight Simulator (FFS), minimum acceptable level "D". The qualification of Flight Simulator Training Devices (FSTD) aims to verify their performance and realism characteristics, as well as classify them in the various existing categories. Qualification is an activity based on technical standards issued by civil aviation regulatory agencies, which establish objective and subjective parameters of quality and realism. In the case of COMAER, FSTDs are used for training provided for in the Instruction and Operational Maintenance Programs of subordinate air units.

2.4. The flight simulator must be approved by either ANAC (National Civil Aviation Agency), FAA (Federal Aviation Administration) or EASA (European Union Aviation Safety Agency), aviation regulatory agencies in Brazil, in the United States and in Europe, which have a system for qualification of Flight Simulator Training Devices (FSTD – Flight Simulator Training Devices), which aims to verify its performance and realism characteristics, as well as to classify it in the various existing categories. The FSTD qualification is an activity based on technical standards issued by civil aviation regulatory agencies, which establish objective and subjective parameters of quality and realism. Only devices with a certification awarded by ANAC can be used to generate flight hours credits in pilot training services, as provided for in RBAC 61 (Brazilian Civil Aviation Regulation).

2.5. To ensure approval by the ANAC, the Bidder may verify its qualification through the website: <https://www.anac.gov.br/assuntos/setor-regulado/empresas/simuladores-de-voofstd/arquivos/Simulador.xls>.

2.6. To ensure approval by the FAA, the Bidder may verify its qualification through the FAA website: https://www.faa.gov/about/initiatives/nsp/data_lists/.

2.7. To ensure approval by the EASA, the Bidder may verify its qualification through the EASA website: <https://lisstdis.easa.europa.eu> (FSTD qualified by EASA and FSTDs qualified by the National Aviation Authority of the respective EU Member State – incl. EFTA States).

2.8. The FSTD can be approved as a means of training in an Air Operator's Operational Training Program (RBAC 121 or RBAC 135), Civil Aviation Training Center (RBAC 142), or in a Civil Aviation School Instruction Program (RBHA 141). In the case of the COMAER, the FSTD are used for training provided for in the Operational Lifting Programs of subordinate air units.
